

CRMMigrate for Dynamics CRM

The simple, cost-effective and painless way to migrate from Salesforce.com to Microsoft Dynamics CRM 4.0.

- Wizard driven
- Quick and easy to use
- Gives you the power of choice in the migration of critical data
- Can be trialed at no cost when your Salesforce.com is due for renewal

Powerful, robust and intuitive

CRMMigrate is a user-friendly application for the migration of data from Salesforce.com to Microsoft Dynamics CRM 4.0. Easy to use, it provides a powerful, robust and intuitive CRM migration tool.

With CRMMigrate, critical customer data can be pre-populated within Microsoft Dynamics CRM 4.0 quickly and cost effectively without the risk of losing data. User-friendly and flexible, CRMMigrate can work with hosted, on premise and Online (US) Dynamics CRM, allowing you to choose how to migrate your data.

When your Salesforce.com is approaching renewal (after one year), CRMMigrate can be trialed at no cost to test the concept before moving critical or large amounts of data.

“QGate’s CRMMigrate for Dynamics solution facilitated a straightforward and comprehensive migration from Salesforce.com to a hosted Dynamics CRM application in a cost effective, intuitive and time saving manner, and was seamlessly delivered from the other side of the world. The support provided by QGate along with their product knowledge ensured a successful outcome.”

Key features

- Easy to use, intuitive and wizard driven
- Cost effective
- Allows rapid, pain free migration from Salesforce.com
- Maps users to Microsoft Dynamics CRM 4.0 and so retains relationships, ownership and associated data integrity
- Mappings provided for standard Salesforce.com tables and fields
- Enables the creation and migration of custom fields
- Robust error logging capabilities
- Purpose built and uses no third party software
- There is no limit on fields, no limit on records and no limit on users

Migration made simple

Using CRMMigrate could not be easier. The Wizard driven application allows users to follow a simple, step by step process for the entire migration from Salesforce.com to Microsoft Dynamics CRM 4.0.

The application features customization settings and error logging to allow the complete and seamless migration of critical customer data. If an error is encountered during the migration process, CRMMigrate will record the error so that any problems with the data can be identified and resolved quickly.

If the connection is lost during migration, there is no need to delete migrated records and start all over again. CRMMigrate will remember the point the connection was lost and will continue with the migration at that point. The application also supports CRM Online.

Why QGate?

QGate has more than 10 years' experience as a CRM, business intelligence and data specialist. We have a proven record of helping companies of all types transform their business. More than half our customers are referrals and we have a market-busting customer retention rate. This is because year after year we deliver on our promise to provide outstanding service and tangible results.
